Welcome

Shared Health Research Information Network (SHRINE)

SHRINE (Shared Health Research Information Network) is a platform for enabling clinical researchers to solve the problem of identifying sufficient numbers of patients to include in their studies by querying across distributed hospital electronic medical record systems.

This wiki is a guide for those who want to learn about the Shared Health Research Information Network (SHRINE) and how to install and implement it at their institution. It includes the following sections:

SHRINE Basics

Documentation

Ontology

Case Studies

Community & Support
