SHRINE 3.3.1 Upgrade Chapter 6 - Database Changes for 3.1.0/3.2.0

Update Schema

Download shrine-setup.zip for SHRINE 3.3.0 in temporary directory and unpack it.

```
wget https://repo.open.catalyst.harvard.edu/nexus/content/groups/public/net/shrine/shrine-setup/3.3.1/shrine-
setup-3.3.1-dist.zip -O /tmp/shrine-setup.zip
unzip -d /tmp /tmp/shrine-setup.zip
```

In that directory find the following database update script for your brand of database: adapter/sql/shrine_query_history-brand.sql . Run the appropriate script on your database. For MariaDB run the following shell commands:

```
mysql -u shrine -pYourPassword shrine_query_history < /tmp/shrine-setup/adapter/sql/shrine_query_history-update-
mysql.sql
```

For MS SQL and Oracle, run the scripts appropriate for your databases.
