

SHRINE 3.3.2 Upgrade Chapter 10 - Try the New Features

After installing and configuring SHRINE, you can verify the installation by navigating to each application's login page and signing in.

- **Clear the browser cache**
- Navigate to the SHRINE Webclient - the url should be in the form of https://your_shrine_url:6443/shrine-api/shrine-webclient/ . This will be the application you use most often. Log in, construct, and run a query. Do this to test that the term index files are correct, and to test out the full flow through the system.

The screenshot displays the login interface of the SHRINE Webclient. At the top, a blue header bar contains the 'ENACT' logo on the left and the text 'The ENACT Network' on the right. Below the header, the page has a light gray background. In the center, the text 'Sign in' is displayed. Underneath, there are two input fields: the first is labeled 'Username' and contains a single character 'l'; the second is labeled 'Password'. Below these fields is a blue button with the text 'SIGN IN' in white capital letters.
