version 1.8

Create. Store. Search. Share.

eagle-i is an ontology-driven, RDF-based distributed platform for creating, storing and searching semantically rich data about research resources of all kinds. eagle-i is built around semantic web technologies and adheres to linked open data principles.

Why did we build it?

How does it work?

How can I try it out?

How do I get the software?

How do I get eagle-i data?
