

SHRINE 4.2.0 Chapter 3.1 - Installing Prerequisite Packages

After installing the Linux OS, install these packages:

- NTP - used to synchronize system clocks:

```
sudo yum install -y ntp
sudo systemctl start ntpd
sudo systemctl enable ntpd
```

- Postfix - used for sending out emails from the SHRINE system (SHRINE can be configured to use alternatives for sending email)

```
sudo yum remove sendmail //if installed

sudo yum install -y postfix
```
