Status

Information for Research Investigators & Staff Scientists

>> >> Pathology Specimen Locator Core Facility at Dana-Farber Harvard Cancer Center **<<**

Development Status

History
The PSL has been operational since 2006. Many developers in the NCI funded SPIN program contributed to this work.

Current (2011)

Renewed interested in searching De-Identified Medical Text and Cancer Biospecimens motivated us to create this community portal for PSL.
There are 3 paid programmers working on various aspects of PSL.

> (i) **Much of the code is using older versions of the SPIN and Scrubber Programs.**
> You help make this project better by contributing documentation, code, and new ideas.

Current Committers

- Biospecimen search at Harvard : Larry Chung
- Open Source development: Andrew McMurry
