

# Manual Installation

**Quick Start installation Guide:** provides a high-level overview of the steps necessary to set up an eagle-i node, with pointers into the detailed guides below.

**Repository Installation, Upgrade and Administration Guide:** provides instructions and information for installing the repository. It also covers general repository maintenance, logging and performance monitoring.

**SWEET and Institutional Search Installation and Upgrade Guide:** provides installation instructions and information for SWEET (Semantic Web Entry and Editing Tool), institutional search and the online help.

**Public SPARQL Endpoint:** provides installation and maintenance instructions for the Sparqler, our public SPARQL endpoint (required as of [3.3.0 Release](#)).

**Upgrade Checklist:** summarizes the steps necessary to upgrade the software and ontology of an eagle-i institutional server.

**Configuration Property Guide:** summarizes configuration properties for SWEET, Sparqler and Institutional Search.

**Data Migration Guide:** this guide is for installations that are interested in upgrading through several releases in one operation.
