net.shrine.authorization.CouldNotInterpretResponseFromPmCell

Summary

SHRINE could not parse a message from the i2b2 PM cell.

Explanation

The most likely cause is that SHRINE is misconfigured to interact with something other than the i2b2 PM cell, a mismatched version of i2b2, or that the PM cell is malfunctioning and responding with HTML instead of i2b2 XML.

Resolution

If you are a user, supply all details of this error to your local site admin.

If you are a site admin, check shrine.conf, ensure that the URL for the PM cell is correct, and ensure that the correct version of i2b2 is running.
