

net.shrine.aggregation.NoValidResponsesToAggregate

Summary

The hub received no usable responses from any adapter.

Explanation

Either every member of the network is down, or the hub is not broadcasting to any sites.

Resolution

If you are a user or admin of a non-hub site, forward the complete details of error on to the hub administrator.

The hub administrator should ensure that the downstreamNodes block contains sites, and that at least one site's URL is correct.
