

net.shrine.authorization.ErrorStatusFromDataStewardApp

Retired in Shrine 1.26

Summary

The local Data Steward App replied with some status other than OK.

Explanation

The most likely cause is that SHRINE's local Data Steward App is misconfigured.

Resolution

If you are a user, supply all details of this error to your local site admin.

If you are a site admin, check shrine.conf, ensure that the URL for the DSA is correct, then ensure that the DSA is configured correctly. The details may provide a lead.
