

net.shrine.adapter.ErrorFromCrcBreakdown

Summary

The CRC reported an error to the SHRINE adapter for an element of a breakdown query.

Explanation

There could be a myriad of reasons for this, most all of which fall under the domain of i2b2. Most likely the breakdowns are not configured correctly. The CRC error available in the adapter's log may provide some useful information.

In SHRINE 1.22 and earlier, SHRINE ignores errors processing breakdowns if the overall count query succeeds. The breakdowns will simply be missing from the query result.

Resolution

If you are a user or an admin, send the admin at the reporting adapter all the details about this problem.
