Verify the eagle-i node is up and running

- The landing page for your new eagle-i node should now be accessible from a browser, e.g.:
  https://eagle-i.miskatonic.edu
- You should be able to log in to the eagle-i repository admin console, using the repository credentials specified at stack creation time, e.g.:
  https://eagle-i.miskatonic.edu/repository/admin
  You may want to create users with different roles and in general poke around the different configuration options.

  > **Evaluation Node**
  >
  > For an un-customized `EVALUATION/DEVELOPMENT NODE`, the default repository credentials are:
  >
  > - username: srau
  > - password: srap

- You should have access to the SWEET, e.g.:
  https://eagle-i.miskatonic.edu/sweet
- You should have access to the institutional search, e.g.:
  https://eagle-i.miskatonic.edu/institution

Log in with one of the users you created and verify you can access the SWEET workbench, create a test organization and publish it, verify it appears in search after being published, etc. You may want to compare your screens with our training node: https://training.eagle-i.net/sweet and https://training.eagle-i.net/institution
