4. <u>Under Topics tab:</u> Verify that user is able to view the Topic details like state, ID, Date created/updated etc. and also edit the topic(only possible in Pending state) by clicking the 'View' button available next to status column	 Click on this "View" button to check Topic description, History and other details This detailed window opens up on clicking View	- View button should be available for all the Topic states i.e. Pending, Approved and Rejected - User should only be able to Edit the Topic details for pending state topics
5. Verify that User is able to log out successfully by clicking the Logout button available under User information dropdown appearing at the top right corner	 Click Logout button to get logged out of the application User should reach to this page	Logout functionality should work properly and take user back to Login page

Application - Steward

#	Test case	Expected Result								
1.	Verify that user is able to log in the DSA-Steward application after entering valid credentials	Username* steward username Password* ***** Enter valid steward credentials here SHRINE DATA STEWARD Topics History Statistics PENDING APPROVED REJECTED <table><tr><th>ID</th><th>Topic Name</th></tr><tr><td>73</td><td>14may</td></tr><tr><td>75</td><td>may 17th</td></tr><tr><td>91</td><td>sdf</td></tr></table> Steward's Home page	ID	Topic Name	73	14may	75	may 17th	91	sdf
ID	Topic Name									
73	14may									
75	may 17th									
91	sdf									

2. Verify that Topic, History and Statistics sections are available on the left side of the page

3. Under Topics tab: Verify that all 3 types of topics are available under their specific tab

PENDING						✓ APPROVED	✗ REJECTED
ID	Topic Name	Username	Date Created	Last Updated	State	Only Pending state Topics should appear under 'Pending' tab	
73	14may	nn80	5/12/2016	5/12/2016	Pending		

4. Under Topics tab: Verify that Steward is able to view the Topic details like state, ID, Date created /updated etc. by clicking the View button.

Also, Steward can Edit the current state of the Topic after clicking the 'Edit' button and selecting the desired state from the dropdown (Pending, Approved, Rejected)

State: Pending view

Topic Id: 73

Date Created: 5/12/2016

Last Updated: 5/12/2016

Topic Name* 14may *

Please Describe Your Query's Intent* nk

Pending EDIT

Pending Approved Rejected UPDATE

5. Under Statistics tab: Verify that Steward can check out the Query count by User and Query Topics by Status data available for last 7 days by default

6.	<u>Under Statistic tab:</u> Verify that Steward can also filter the Query count by User and Query Topics by Status data after applying the Start and End Date Range	
7.	<u>Under Statistic tab:</u> Verify that Steward can also visualize any researcher's ontology usage by checking out the Query digest window and further filter it by topic	
8.	Verify that User is able to log out successfully by clicking the Logout button available under User information dropdown appearing at the top right	

Application - Webclient

#	Test case	Expected Result
1.	Verify that user is able to log in the Web client application after entering valid credentials	
2.	Verify that below mentioned 4 major sections are appearing on webclient landing page 1. Navigate/Find Terms 2. Query Tools 3. Previous Queries 4. Query Status	

3. Under Query tool section: Verify that user can request a new topic by clicking the 'Request New Topic' button available under Query tool section

DSA Application should open up and user should be able to create a topic successfully

4.	<u>Under</u> <u>Query</u> <u>tool</u> <u>section:</u> Verify that a drop down consisti ng all Approv ed topics are appeari ng
----	--

[illegible]

5.

Under Navigate/Find terms: Verify that user is able to run following set of queries successfully

- Query in each data element (demographic, dx, etc)
- Query terms that are folders, leaf nodes, modifiers
- Run date limited query for dx term
- Run multiple query

The screenshot shows the 'Query Tool' interface. At the top, there is a 'Query Name' field and a 'Temporal Constraint' dropdown set to 'Treat all groups independently'. Below this, there are three groups of criteria, each with a 'Dates' dropdown, an 'Occurs > 0x' field, and an 'Exclude' checkbox. The criteria are connected by 'AND' operators. Each group has a green box labeled 'one or more of these' below it. The criteria are:

- Group 2: Complications of pregnancy, childbirth, and the puerperium (630-679.99) [Admit Diagnosis]
- Group 3: Pathologist Cvx/Vag Cyto, Enoxaparin
- Group 4: Female, >=65 years old

At the bottom, there is a 'new22' dropdown, a 'Request New Topic' button, and buttons for 'Run Query', 'Clear', and 'Print Query'. A 'New Group' button is highlighted with a green box.

- Run multiple queries with excluded terms
- Multiple terms in 1 panel
- Multi-event query

6. Under Query status: Verify that User is able to see the running query status under Query Status tab

Query Status
