

3.1 - Installing Pre-requisite Packages

After installing the Linux OS, there are a couple of packages that you will need to install:

- Postfix (used for sending out emails from the SHRINE system)

```
sudo yum remove sendmail //if installed  
  
sudo yum install -y postfix
```

- NTP

```
sudo yum install -y ntp  
sudo systemctl start ntpd  
sudo systemctl enable ntpd
```
