

Status

Spin has been used to develop federated search applications for

- Cancer Research Requiring Human Tissues ([PSL](#))
- Biosurveillance and Population Health Statistics (AEGIS)
- Clinical and Translational Research ([SHRINE](#))
- Research Resources (Eagle-I)

Spin releases once a month (barring exceptional circumstances) at about the end of each month.

Planning about features and releases happens during a weekly conference call, and on the [Spin developers mailing list](#).
