

SHRINE 3.2.0 Upgrade Chapter 8 - Try the New Features

After installing and configuring SHRINE, you can verify the installation by navigating to each application's login page and signing in.

- **Clear the browser cache**
- Navigate to the SHRINE Webclient - the url should be in the form of https://your_shrine_url:6443/shrine-api/shrine-webclient/ . This will be the application you use most often. Log in, construct, and run a query. Do this to test that the term index files are correct, and to test out the full flow through the system.

The screenshot shows the login interface for 'The SHRINE Network'. At the top, there is a blue header bar with the network logo on the left and the text 'The SHRINE Network' and 'Powered by the NCATS CTSIA Program' on the right. The main content area is white and contains a 'Sign in' section. This section includes a 'Username' label above a text input field, a 'Password' label above another text input field, and a blue 'SIGN IN' button below the password field.
